

Technology Helper

THE VIRTUAL TEACHING AND LEARNING COMMUNITY (VTLC)

The VTLC is an online tool that allows our teachers to learn various technology topics by completing a variety of online modules. The modules are self-paced and can be accessed from any computer with an internet connection. You must register by following the procedure listed below.

1. Go to **www.star-online.org**
2. Click on **Register to Access the VTLC**
3. Enter our license # which is **AC78128**
4. You will be given a unique username and password at this point. **WRITE IT DOWN** as you will need it to access the site in the future.
5. To complete the registration process, you will be asked a series of questions regarding your proficiency and interest in the various module areas. (This should only take a few minutes.) This process will help guide you into which modules are most appropriate for you.
